Victor-Series-600™  
Expeller® Press

Since the invention of the Expeller® by Anderson in 1900, so many new and beneficial features have been designed into this innovative processing machine for the oilseed industry.

Please contact us and we will discuss and show you the new innovations that make this equipment the most efficient, productive, durable and maintenance free Expeller® press, such as:

- VFD driven main shaft for optimum capacity and residual oil performance
- Expander design feed section which eliminates force feeding and increases rapid oil release
- Innovative discharge choke reduces load on thrust bearing, thus increasing wear life on bearings, seals and sleeve. The choke design is maintained without disassembly of any other press assemblies.
